

Customer Testimonials

What Our Customers Say About Sentinet Computing Ltd.

No7 Contact Lens Laboratory

Ian Goble, Sales and Marketing Director

“Our company has been using the services of Sentinet Computing for a number of years; in fact I believe that we were one of their first customers.

Prior to Sentinet we had used several other companies and we were continually disappointed with the level of service, particularly with time sensitive issues.

From replacing fuses to full network installation the service from Sentinet is always first class and their depth in knowledge is unmatched. They are also able to explain complicated issues at my low level of IT and that really helps.”

SureStart Ore Valley

Gary Storer, Community Development Worker

“Thank you for your very timely warning, the virus hit my computer this afternoon but was disabled by the device I downloaded from the Norton site on Saturday morning after receiving your message. Thank you for your prompt alert; you have saved me a great deal of time and worry”

Amadeus Acoustic Solutions Limited

John Locke, Director

“As a small local (Battle) based company with plans to expand it was critical that we had reliable systems engineers for our ever growing LAN. After several “difficult experiences” with so called experts we turned to Sentinet; 3 years later we find them to still be as enthusiastic and competent as day one.

In Sentinet Computing we have people who enjoy what they do, do it superbly well, available pretty well at the drop of a hat, and have a crazy line in garish ties! What more could one want!”
