

Can Your Web Site Do All This...

And Still Save You Money?

When we set up your new web site you get the richest package you could possibly imagine.

Here's what's included:

Standard
Options

Joomla

This is the core system that drives your new web site.

Templates

Different web site templates give your new web site a distinctive new look without altering your content. We help you select the best template for your particular web site and then install it ready for you to use.

Included Options That Extend Your Site's
Capabilities

- Extended editor to make updates to your web site even more user friendly

- User friendly explorer for file management across your web space

- Back up your entire web site and download it as a single file. If you ever need us to restore your site it can be up and running in about an hour

Site Map for your visitors as well as a Google Site Map file that can be uploaded to Google to increase your web site's search engine rank

-
Comprehensive site statistics; visitors, pages viewed, search engine bot activity, search terms used to find your site and sites that referred visitors to you

-
Meta Tag Generator for search engine friendly meta data to help increase your search engine rank

- Bad Behavior Blocker protects your site against malicious activity

Additional Options That Can Be Installed

- Professional shopping cart system with built in integration for several payment gateways

-
Fully featured forum that can be used to provide customer communication

- Private Messaging allows your registered site members to send messages to each other through your site as well as provide another channel of communication between you and your customers. It also integrates seamlessly with the forum

- Send newsletters and other mailings to your subscribed visitors

-
Private and Public Event Calendars. This is ideal for group-based projects and publicity

-
Classified Adverts section on your web site; this is ideal for community sites, schools, charities and similar organisations.

- Google AdSense. If you are planning on drawing revenue from your site then this plug-in makes it very easy to take advantage of Google's AdSense program. Again this is ideally suited for community projects and charities

Remember, your new web site can take advantage of all of this and cost as little as £70 per year to run, so there's absolutely no reason not to have a professional high quality web site.
